PROJECTS

Hotel Management System | React.js, Node.js, Express.js, MongoDB

- Developed a full-stack web application handling reservations, room availability, customer records, and billing.
- Implemented complete CRUD operations with a relational database backend, reducing manual booking effort.
- Designed an intuitive front-end interface that improved data entry speed and reduced errors.
- GitHub : github.com/KMDNShyavinda/hotelManagement

University Event Management System | Python, Node.js, PostgreSQL

- Built a web-based platform for managing university events, registrations, scheduling, and attendance tracking.
- Designed a structured database schema ensuring data integrity across multiple concurrent events.
- Enabled administrators to generate attendance reports, improving post-event record-keeping efficiency.
